

# Project Manual Document

A Line Up is a list of tasks that need to be completed, typically organized in a order . It is one of the simplest solutions for task management and provides a minimal and elegant way for managing tasks a person wishes to accomplish. Our aim is to design a simple and elegant website for people to keep a track of the status of their tasks.

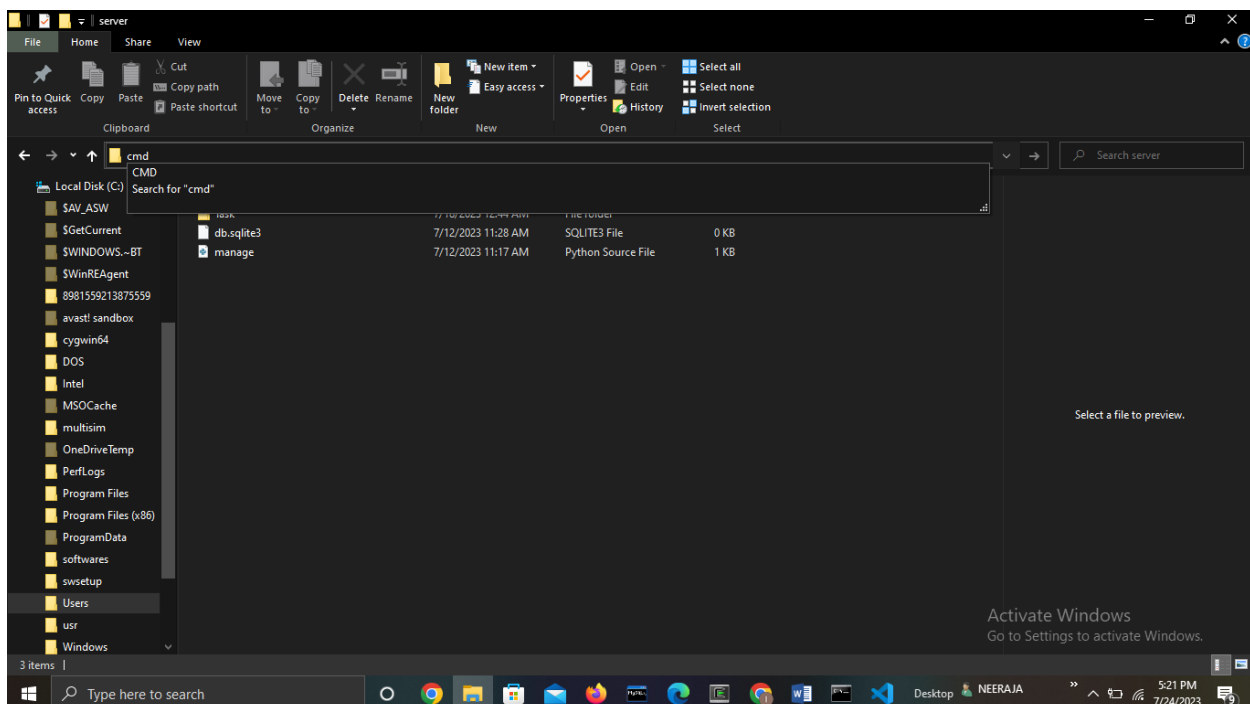

## 1. Open the file folder and go to the project files folder.

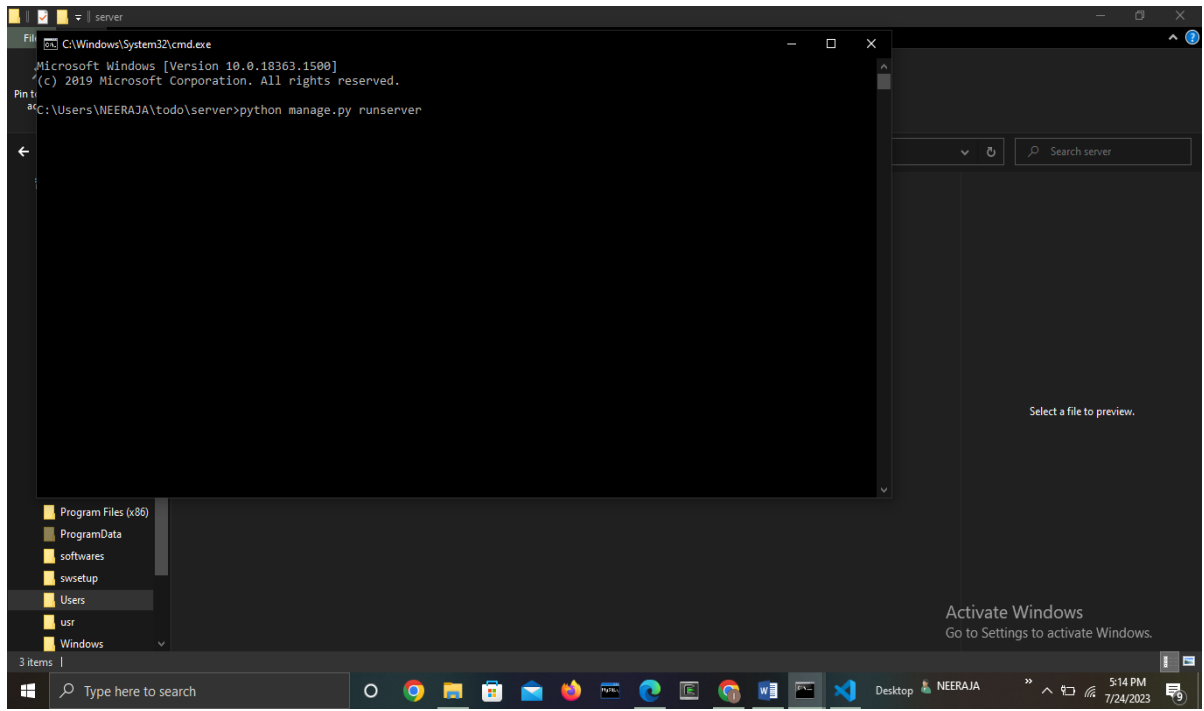

## 2.Go to the server folder.

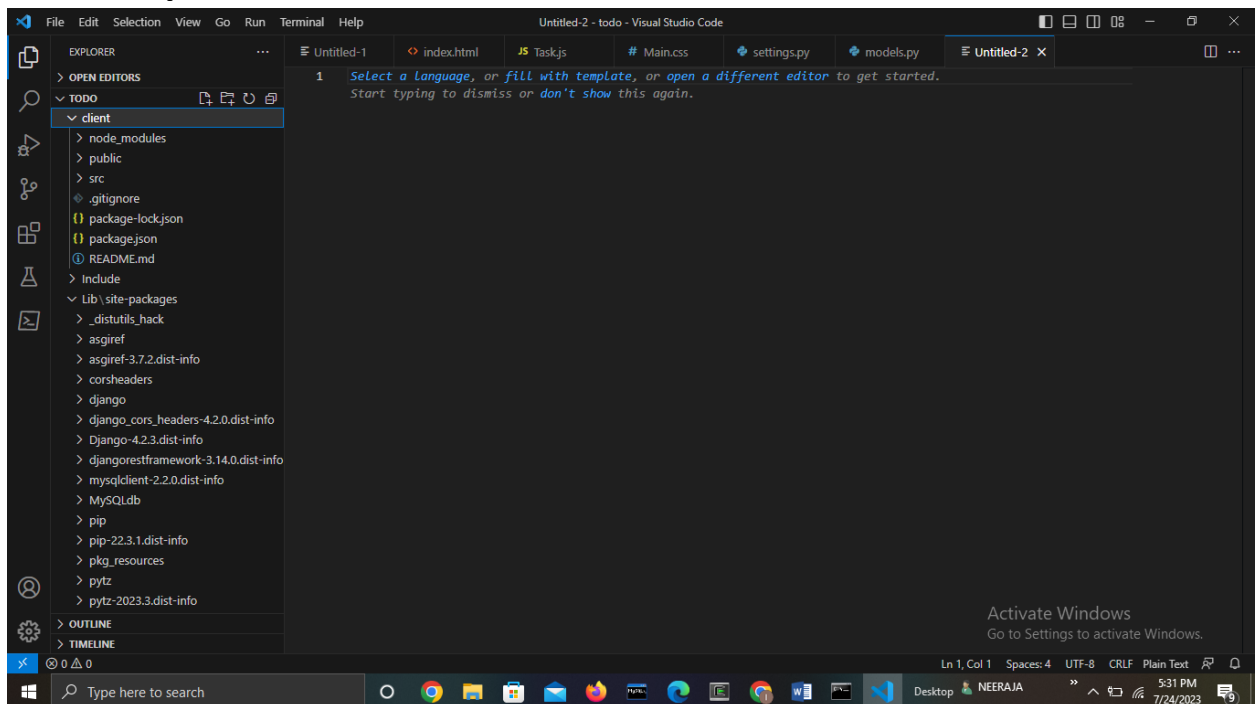

## 3.Open the command prompt

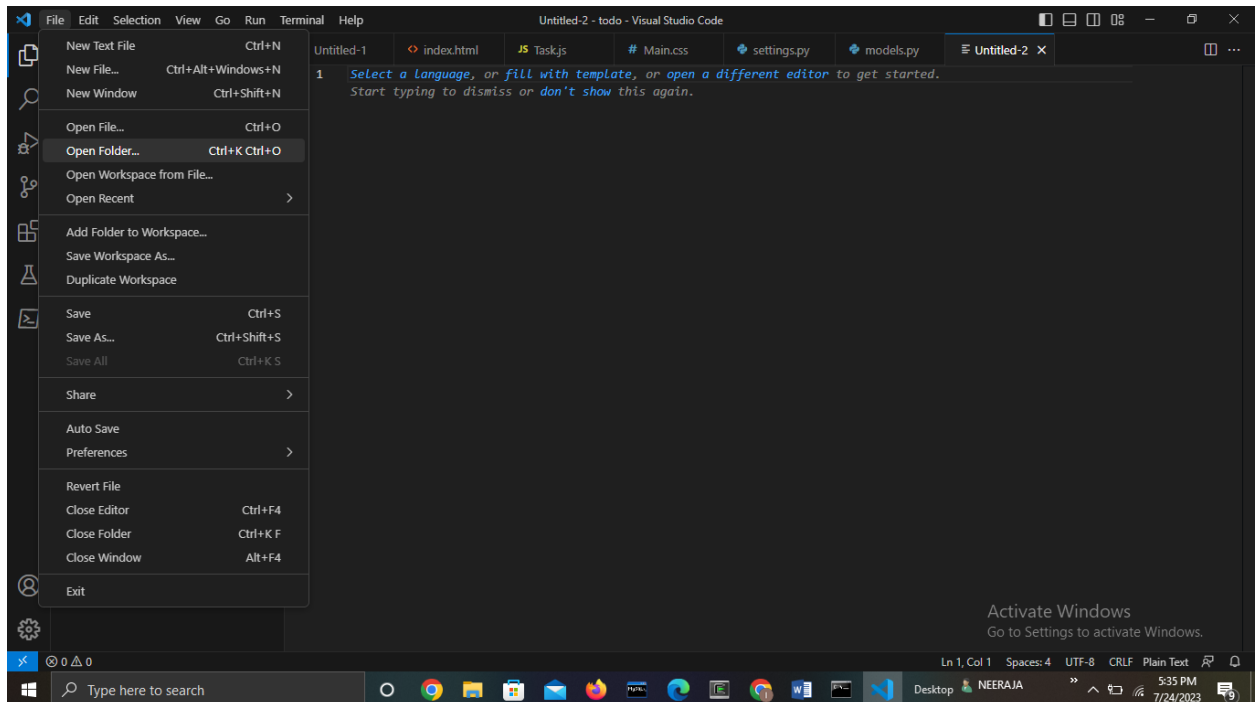

4. In the command prompt type command – python manage.py runserver

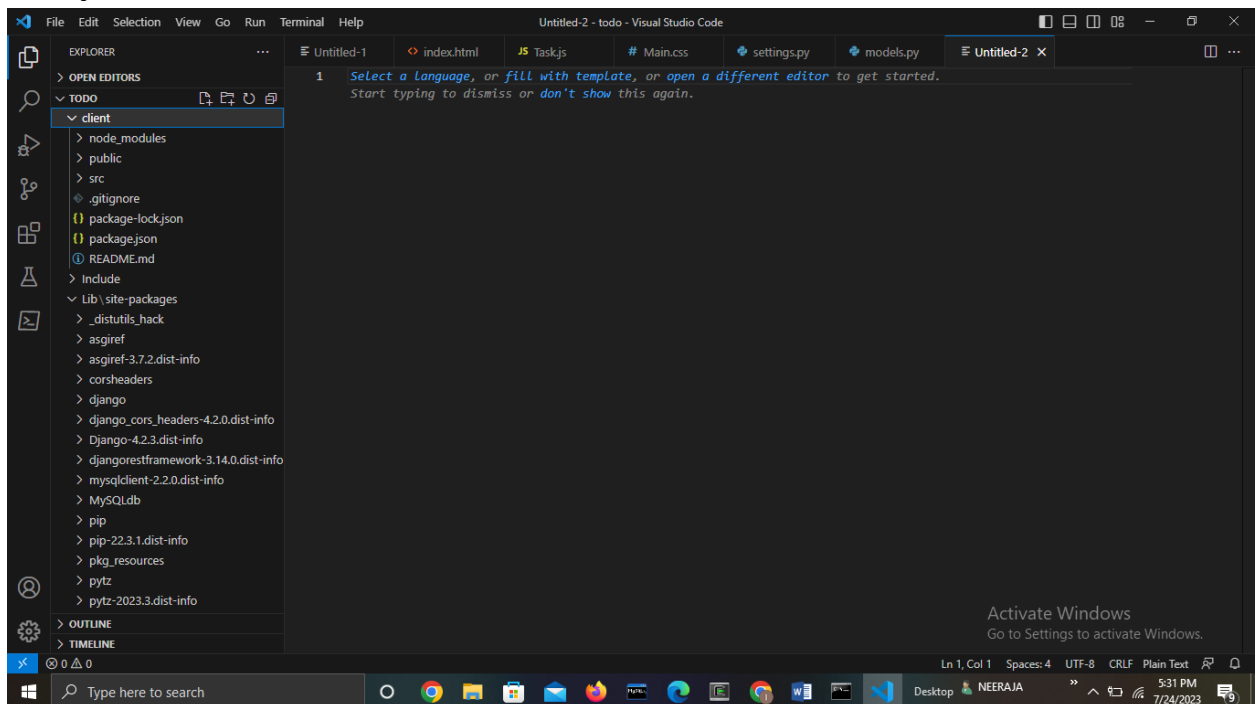

5. Now open the visual studio code editor.

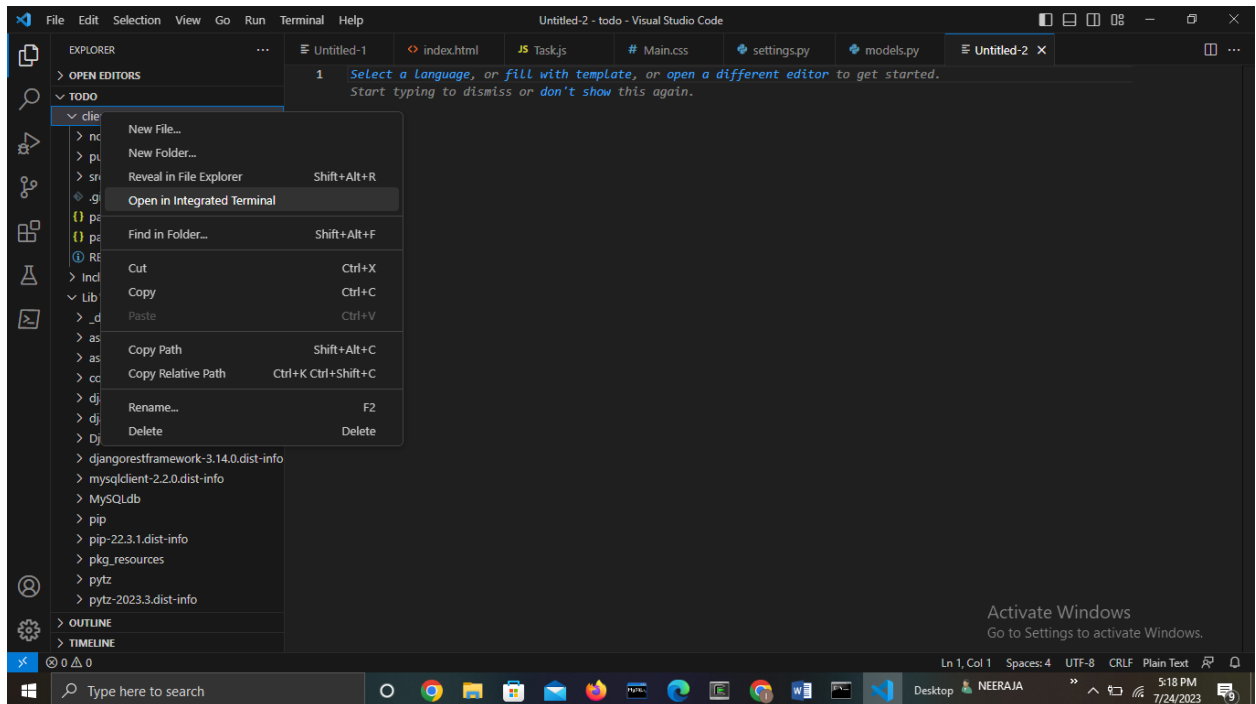

## 6. Open the new file folder.

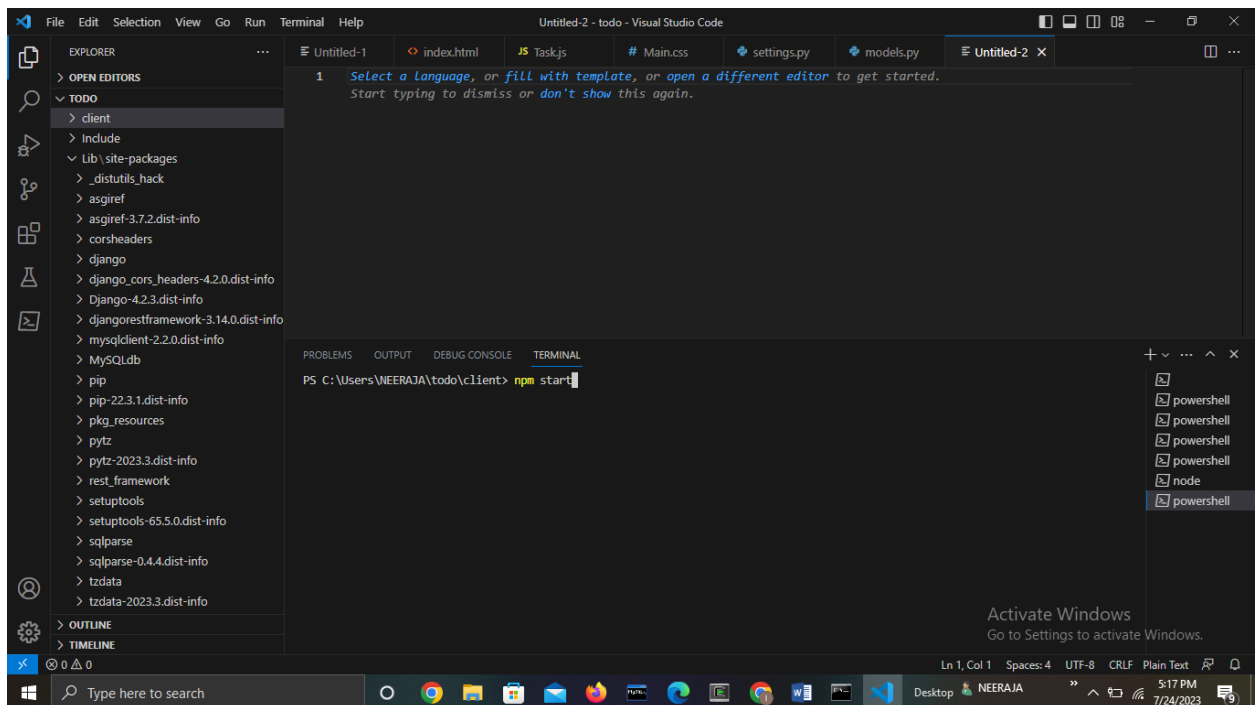

## 7. Open the todo name file folder

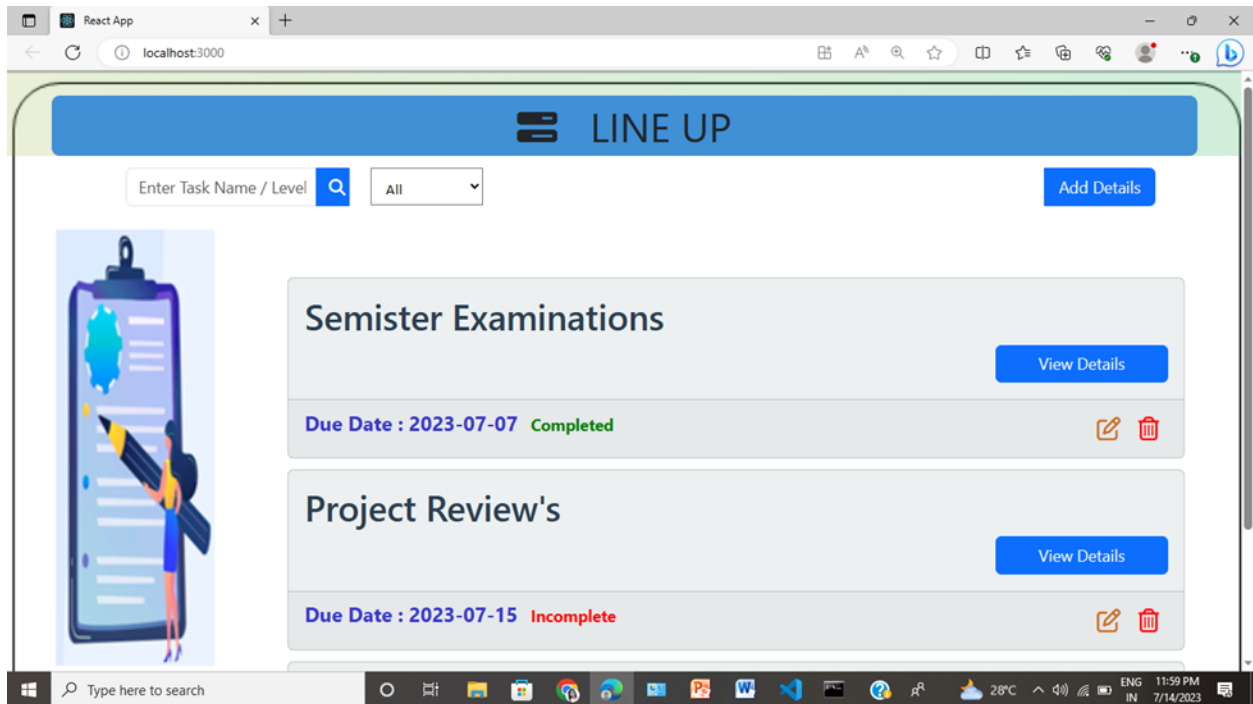

## 8. Right click on the client and click on Open in Integrated Terminal.

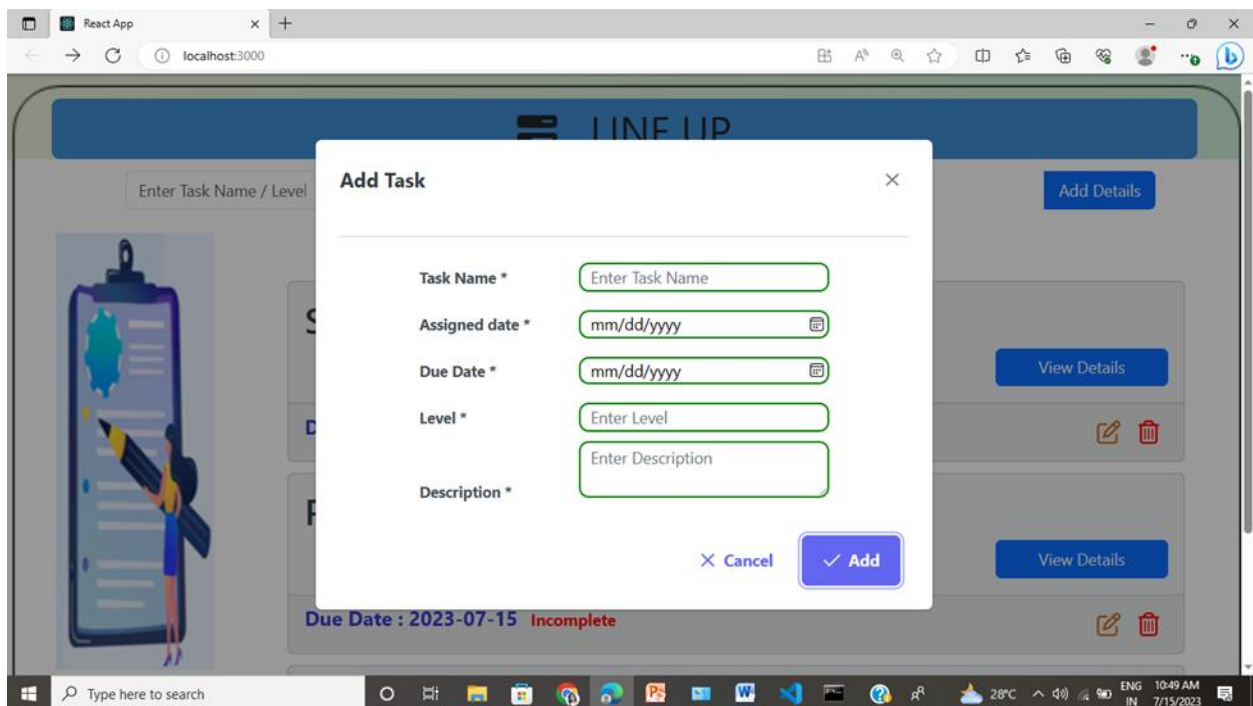

## 9. In the terminal type npm start

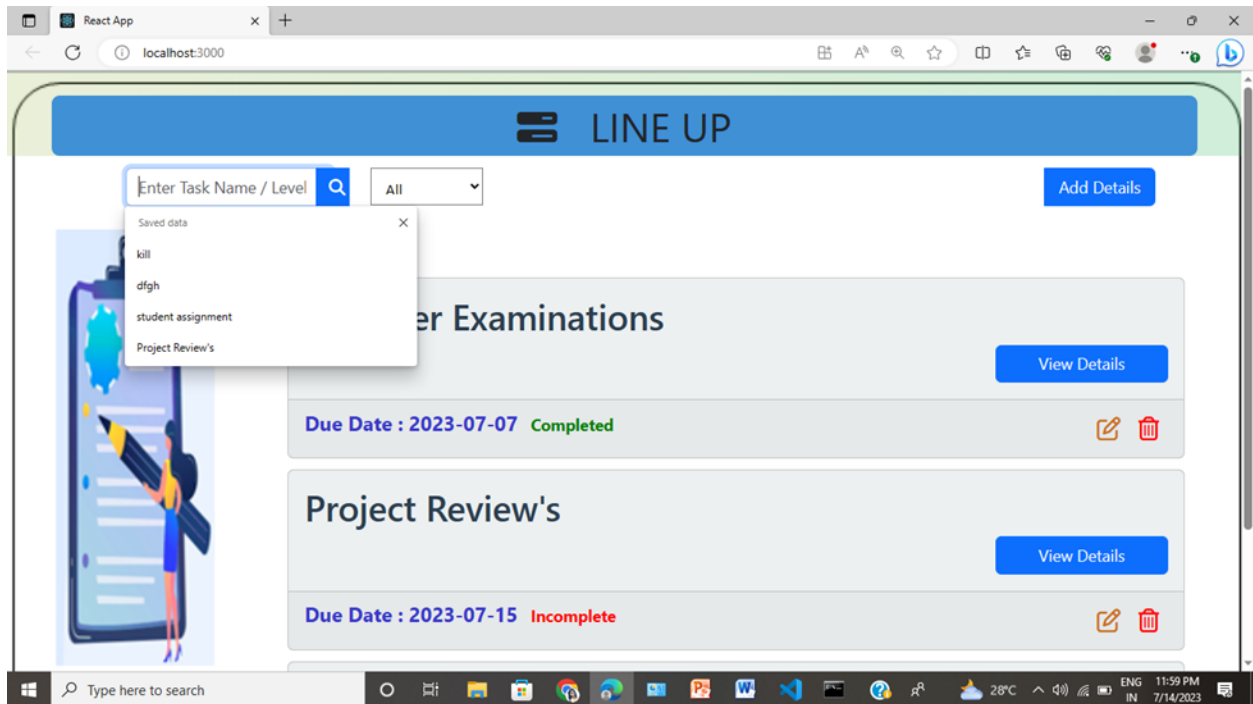

10. Now Our website will be open.

11. We can create a new task using ADD DETAILS button.

## 12. We can search the task by using Task name or level.

## 13. We can sort the tasks by week criteria.
