

# PROJECT MANAGEMENT DOCUMENT

**Title:** Line Up

**Number of team members:** 3

**Team-member 1:**

Name: G.Lakshmi Neeraja

ID No: S180746

Role: Team Lead and researcher

Responsibilities:

- Guide team members for successful delivery of the project.
- Analyse project development status and timelines and
- Assign tasks to individual team members.

**Team-member 2:**

Name: P.H.K.Maha Lakshmi

ID NO: S180404

Role: Developer

Responsibilities:

- Developing the project.
- Provides suggestions regarding alternate approaches to solve the problem.

**Team-member 3:**

Name: G.Srinu

ID NO: S180989

Role: Quality Assurance Engineer and Tester

Responsibilities:

- Understand system requirements to create test cases.
- Analyse non-functional requirements of the system.

**Timeline:**

16 Mar 2023: Contacted project guide regarding project details and domains.

19 Mar 2023: Session with project guide, discussed and evaluated some project ideas. We were asked to find some good projects.

20 Mar 2023: Finalised a project and its title with the project team.

22 Mar 2023: Analysis from IEEE journals were discussed with the guide and finalized the project title.

27 Mar 2023: Gathered related information regarding the project.

06 April 2023: Gathered related datasets for the project.

08 April 2023: Updated project details and project title to the guide.

05 May 2023: Researched on the project background.

06 May 2023: Assigned roles to the team members regarding the project.

07 May 2023: Completed project Abstract and project management document.

08 May 2023: Submitted project Abstract to guide. We were informed to proceed further and complete Introduction, Existing system, proposed system, Literature Survey and SRS for the project.

13 May 2023: Review 1 with panel.

14 May 2023: Informed the guide about review 1 and requested for ideas & suggestions.

06 June 2023: Informed about review to faculty and requested for suggestions regarding project.

08 June 2023: Researched about project and read articles related to skin cancer.

16 June 2023: Gathered reference source code for the project.

17 June 2023: Prepared rough documents for the project and analysed the documents, executed the source code.

18 June 2023: Review 2 with faculty.

08 July 2023: Analysed the source code and build idea for project implementation.

09 July 2023: Gathered relevant information for documentations and modified old documentations.

10 July 2023: Observed the existing systems and started code building for project.

11 July 2023: Run several source codes for better and prepared documentations.

12 July 2023: Done document modifications, implementing the code and rectified errors.

13 July 2023: implemented the code and prepared documentations.

14 July 2023: Analysed the implemented code and made necessary documentations of project.

15 July 2023: Review 3 with guide.

Persons Hours spent till now :- 50 hrs / person

Required no of hours to complete the project :- 80 hrs/person

Estimated deadline :- 17 June 2023

No of lines code completed till now :- 1000loc
